

The most important words that describe me are: Ambitious, Pragmatic, and Outcome-Oriented. The basis for progress is the drive for knowledge. I believe that with determination, attention to detail, and a solid logical approach, anything is possible. This perspective is critical to my philosophy as a developer.

WEB DEVELOPMENT PROJECTS

Dope Vinyl –an e-commerce website where users search for and purchase vinyl records

- ♦ Built with Python, Django, Bootstrap, and Stripe API
- ♦ Responsibilities: Stripe API and Login/Registration Page

Sherlock Bones - a resourceful website for users to post lost and/or found dogs in their area utilizing a map with pin points

- ♦ Built with Ruby, Rails, Bootstrap, Materialize, and Google Maps API
- ♦ Responsibilities: Login/Registration Page and Front End Styling
